Response to Amendment

This Office Action is in response to a communication made on April 12, 2006.

The Change of Address has been received on June 2, 2006.

Claims 1-44 have been cancelled.

Claims 45-50 have been newly added.

Claims 45-50 have been allowed.

EXAMINER'S AMENDMENT

Specification

Pursuant to MPEP 606.01, the title has been changed to read:

- A SMART SECRETARY FOR ROUTING CALL OBJECTS IN A TELEPHONY
NETWORK –

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because there have been informal corrections made to some of the drawings. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest neither singly nor in combination the features of a method of routing calls by receiving an identification of an incoming phone call in the form of a call object in a persistent store, translating the call object to a smart secretary object in order to identify the recipient and the recipients' receive preference objects, routing the call according to the preference object, or if the preference object does not exist translating the secretary object back to a call object and ringing a phone associated with the recipient. These differences are located in each independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U. S. Patent No. 5455854 issued to Dilts, because it discloses object oriented routing of phone calls.

U. S. Patent No. 5655015 issued to Walsh, because it discloses creating an object for a call and examining user preferences.

U. S. Patent No. 5241588 issued to Babson III, because it discloses an object oriented call routing involving user customized preferences.

U. S. Patent No. 6330319 issued to Moghnie, because it discloses an object oriented method of routing phone calls.

U. S. Patent No. 6393481 issued to Deo, because it discloses using objects and events to route phone calls.
